

Integrated Administration and Control System

BMT is a family company that joins more than 100 years of experience and tradition in the sector with the innovation and strength carried out by a new generation.

BMT arises with the commitment and determination of developing its activity on vessels repair and maintenance, giving priority to quality, safety, and environmental respect.

To achieve it, the Management Board has implemented, maintains, and improves the Integrated Administration and Control System based on UNE-EN ISO 9001, UNE-EN ISO 14001 and ISO 45001 Regulations. The firm offers a maximum quality service, always working in a safe way and respecting the environment to achieve our clients' highest satisfaction.

The basic principles in our commitment are the following:

- Encourage and promote an integral prevention by means of an active protection of workers' safety and health.
- All our workers must consider Safety and Health in Work as an imperative responsibility.
- Control and reduce our wastes and consumptions as well as appraise and minimize the environmental impact that our activity might cause whenever it is possible both technically and economically.
- Protect the environment including the prevention of pollution, and others specific commitments relevant to the context of our organization.
- Fulfill the laws in force, as well as all the requirements applying us.
- Assess the environmental impact of our services and activities and define processes to reduce them.
- Fulfill always our clients' demands and requirements.
- Involve both our suppliers and clients in the awareness of the need to preserve and take care of environment; as well as the dangers and risks to which they are associated.
- Always work under parameters allowing the revision and continuous improvement in the supplying of our activity and integrated system.
- Involving the whole technical staff in the achievement of our internal goals and include each one of BMT employees in the improvement of the firm.
- Staff training and awareness in the Integrated Administration and Control System are always highly promoted by the Management Board.
- Establishing quality, environment and occupational safety and health objectives aligned with the strategic direction, taking into consideration the context and the stakeholders.
- Likewise, the Management Board has the commitment to subscribe, inform and fulfill the Policy appearing in BMT Integrated Administration and Control System.
- This policy will be checked periodically by the Managing Board to implement the possible changes that might arise both internal and externally.
- Encourage consultation and participation of workers at all levels, as a contribution to decision-making on the measures and changes proposed for the performance of the OSH.
- Making sure that the working conditions are optimal by evaluating the risks that may occur in the processes, eliminating the dangers and reducing the evaluated risks, as far as possible.
